

**BALANCED PRICES AND THE INFLATION SPIRAL
IN THE SIMULATION OF THE LARGE AND COMPLICATED
ACTIVE SYSTEM DEVELOPMENT**

N. B. Baeva, N. Ye. Krasova, V. V. Lebedev

The biodynamic model of the non-linear balance is worked out in this paper. The analytical type of the inflation spiral function is defined. It is proved that there are balanced prices for any inflation impulse, such as increase in income, and the ways of calculating them are offered.
