

# **THE APPLICATION OF THE QUANTATIVE APPROACH TO THE LEXICOLOGY OF THE CZECH LANGUAGE**

*V. V. Tarkhova*

In this article we make a research in Czech language using an analysis that was developed by V.T. Titov. This analysis includes four parameters: functional, syntagmatic, paradigmatic and paradigmatic. The results on each parameter are shown in the tables and in the graphs. The main aim of this research is to separate out the main lexical and semantical items for Czech language.
