

**THE ANALYSIS OF RECOGNITION METHODS,  
BASED ON CORTICAL BONES DESTRUCTION  
PARAMETERS, OF A WAY OF TRAUMATIZES IMPACT**

*V.A. Golub, N.V. Ogarkova*

In the following paper various recognition methods of a way of traumatizes impact based on image cluster recognition for consecutive two-stage procedure of cortical bones destruction parameters analysis are considered. Various methods application results are adduced. The optimal cluster recognition method of a way of traumatizes impact is found.
