

AMINOPYRAZOLES IN REACTIONS WITH DERIVATIVES OF METHYLENACTIVE NITRILES

V.I. Krylskaya, Kh.S. Shikhaliev

Interaction of 3-methyl-4-phenyl-1H-pyrazol-5-amine with ethoxymethylene- and benzylidenemalononitrile, also with ethoxymethylene- and benzoylcyanoacetate leads to substituted pyrazolopyrimidines.
