

**SANITARY CABINS IN OAK GROVES
OF THE VORONEZH AREA:
PROBLEMS, TENDENCIES, PROSPECTS**

V. S. Malikov, V. V. Tzaralunga

The analysis of dynamics of the areas and volumes of sanitary cabins in oak groves of the Voronezh area is given. The problems connected to sanitary cabins in conditions of amplifying degradation of oak groves are designated. Objective tendencies of increase in intensity and frequency of selective sanitary cabins are revealed. Increase of a demand of this kind of cabins is predicted at expected recurrence of the phenomenon of mass dying off oak groves of area.
