

IDENTIFICATION OF ACID AGARICUM BY IR-SPECTROSCOPY METHOD

M. V. Gavrilin, V. G. Belikov, A. U. Airapetova, P. A. Tsukanova

Two different samples of *Fomitopsis officinalis* was taken, which was collected in Altaysky kray and the acid Agaricum was extracted. Identification of the extracted acid was made by IR-spectroscopy method and was compared with the standard acid. IR-spectrum of extracted acid and standard of acid Agaricum has been identified.
