

## **THE CHANGE DYNAMIC OF PERIPHERAL BLOOD LEUCOCYTE LEVEL AFTER CYCLOPHOSPHANE INJECTION AGAINST A BACKGROUND ACTION OF FERULIC ACID**

*M. A. Oganova, L. E. Nazarova*

The influence of ferulic acid in doses 100 and 50 mg/kg on the change dynamic of the leucocyte level after the single 125 mg/kg of cyclophosphamide injection was studied. It was determined that preventive ferulic acid administration in the dose 50 mg/kg normalize the leucocytal indexes in the peripheral blood.
