

**PHARMACEUTICAL ECONOMY THE ANALYSIS WITH USE
OF MODELLING RESEARCHES OF BY-EFFECTS
OF REPLACEABLE HORMONAL THERAPY OF CLIMACTERIC
FRUSTRATION AT WOMEN ON THE EXAMPLE
OF TERRITORIAL FORMAOONS OF STAVROPOL TERRITORY**

E. Z. Otemisov, S. A. Parfejnikov, A. Manar

The Demographic situation in Russia Has led to increase in a share of persons of elderly and senile age therefore interest to physician-social problem given age group of the population. At emphases is spared study quality to lifes of the womans climacteric period, since on background of climacteric frustration it vastly grows worse.
