

LEGAL AND NORMATIVE BASIS OF THE MEDICINES CIRCULATION IN CHECHEN REPUBLIC IN CONDITIONS OF TRANSITION PERIOD

A. Zh. Hadzhieva

Using the strategic management theory, system and program-special-purpose approaches there was developed the conceptual model of state control in the sphere of medicines circulation on the regional level. The fundamental principles of optimization of medicines supply of the republic population and the mechanism of its realization were defined. The Bill of ChR "On the medicines supply of the citizens of Chechen republic" was developed, there were also defined the legal and normative priorities of the regional pharmaceutical service and chemist's subjects regardless of their forms of property and also responsibility and competence of RF and its subjects, local authorities in the sphere of protection of population health.
