

## **APPLICATION OF SULPHATED POLYSACCHARIDES FOR ACTIVATION OF ELECTRODES OF QUARTZ CRYSTAL IMMUNOSENSOR**

*E. N. Kalmykova, A. V. Garbuzova, T. N. Ermolaeva, N. Yu. Zubova*

Different immobilization procedures of specific antibodies to bacteria *Y. enterocolitica* O:3 are investigated. The procedure of formation of a biosensitive layer of quartz crystal immunosensor with using sulfured polysaccharide (carraginan) is proposed.
