

## **DAMAGES ON THE OAK CAUSED BY THE THUNDERSTORM**

*V. V. Tsaralunga, E. S. Kagarmanova*

The description of the trees damaged by the lightning is given. The occurrence of the present indication among the other pathological indications on the petiolate oak is revealed. The recommendation for the including of damages on the oak caused by the thunderstorm in an estimation scale of the deciduous plantings' condition as an indication determining a category of a tree is suggested.
