

# **DEFINITION OF SPECTRAL CHARACTERISTICS SPIRIT SOLUTIONS OF VEGETABLE OILS AND OIL EXTRACTS BY THE METHOD OF SPECTROPHOTOMETRY**

*O.V. Rybakova, E.F. Safonova, A.I. Slivkin*

Quality of lipid complex of some vegetable oils and the oil extracts applied in medicine and pharmacy is studied. UV-spectra spirit solutions of studied objects are received. Values of an index oxydation and a specific parameter of absorption for studied objects - the basic sizes describing total accumulation primary and by-products of oxidation by method of spectrophotometry are calculated.
