

THE INFLUENCE OF HYDROXOCOMPLEXES ON BOTH SEDIMENTATION AND PHASE COMPOSITION OF SNS AND PBS FILMS

V.N. Semenov, N.M. Ovechkina, D.A. Khoviv

Distributing diagrams of tin (II), lead (II) hydroxocomplexes and hydroxides have been built on theory basis. The influence of these compounds on the phase composition of SnS and PbS films, obtained from thiourea complexes, was shown.
