

THE DYNAMICS OF THE GALICHYA GORA VEGETATION FOR THE PERIOD OF 95 YEARS

L.N. Skolzneva, A.I. Kirik

The paper traces the changes in the Galichya gora plant cover through 95 years of the investigation. It is established that the territory of this isolated terrain feature being under the reserve conditions is gradually covering with forest. At the same time there are some peculiarities of landscape, which promote preservation of unique steppe flora of the Galichya gora.
