

# **CONSEQUENCES OF THE REALIZATION OF DIFFERENT PENSION SURVEY'S CONCEPTIONS**

*Tumanjantz K. A.*

This article analyses the affect that pension model may have on the labor's market, wages, personal incomes and national economy in whole. The author researches such pension survey's conceptions as private management of savings, age's aid, the loss of revenue aid and several others. The author makes conclusions about preferences of the system based on private ownership of savings from the point of view of increasing effectiveness using labor's and investment's recourses.
