

## **APPROACHES TO RESEARCH OF INNOVATIVE ACTIVITY AT THE REGIONAL LEVEL**

*E.V. Koveshnikova, I.N. Shchepina*

The article is continuation of the research published in previous number of this Journal. In work it is lead cluster analysis of innovative potential of Russia regions and results of its realization with the subsequent allocation of typological groups of regions. On the basis of the multiple linear regression model influence of some parameters of innovative activity on volume of innovative production is estimated. Besides the problems demanding deeper study are certain.
