

## **SANATORIUM RESOURCES TREATMENT COMPLEXES AS THE ELEMENT OF MEDICAL SYSTEM**

*A.A. Sarkissyants*

Population health is one of the most important elements of any state social, cultural and economic development. Population health is mainly characterized by the medicine effectiveness and population social security, especially by the working population. But the medicine itself can not provide population with complex programmed realization to support people's health and to make them healthier. This article highlights practical dependence and the importance of sanatorium treatment for population health recovering and for labour resources quality growing.
