

## LANDSCAPE AND FLORISTIC ZONING OF VORONEZH URBAN DISTRICT

*A.Ya. Grigoryevskaya, L.A. Lepyoshkina*

On the basis of the analysis of revealed flora (1428 species of vascular plants) in the Voronezh urban district six landscape and floristic areas are found. Nemoral, boreal, steppe, meadow, marsh and weed floristic complexes are studied in the structure of these areas. These complexes display the degree of landscapes anthropogenic transformation.
