

**RESEARCH OF COVER AGAIN HALO OF DISPERSION  
OF MICROELEMENTS WITH HELP OF GEOELECTROCHEMICAL  
METHOD IN SEARCH OF OIL AND GAS**

*Koncenebin Y. P., Shigaev V. Y., Shigaev Y. G.*

The results of the researches of the imposed auras of dispersion of microcells by a geoelectrochemical method in the search and prospecting of oil and gas are considered in the work. The revealed regularity in the distribution of parameters testifies to the opportunity of the use of the geoelectrochemical method for the search and prospecting of hydrocarbon deposits.
