

THE GEOLOGICAL STRUCTURES OF EAST PART MAFIC-ULTRAMAFIC ROCS MASSIF SIRBA-ABAY (ETHIOPIA, NORTHEAST AFRICA)

Belov S.I., Sinyukov Y.D., Bozhko E.N.

The first data are published in article on mafic-ultramafic magmatic rocs massif Sirba-Abay. The massif is found recently out in territory of Abyssinian highlands. Geological structures of east Africa in which the complex mafic-ultramafic magmatic rocs is located, are traced both in northern, and in a southern direction where the largest are known platinum-bearing deposits Great Dyke Zimbabwe and Bushveld.
