

**MODERN ACHIEVEMENTS, TENDENCIES  
AND POSSIBLE PROSPECTS MICROSEISMIC  
TELESCOPING THE EARTH'S CRUST**

*Dubjansky V.I.*

In the brief review of modern achievements of industrial seismic prospecting and the burning “passive seismic prospecting” draws a parallel between these methods using accordingly diffused and micro seismic fields. Despite of known technological, methodical and economic distinctions of these methods, their association is supposed within the framework of progressive technology of a method Micro seismic Telescoping the Earth's crust.
