

ECOLOGO-GEOLOGICAL ESTIMATION OF NATURAL AND TECHNOGENIC DEFLATION FACTORS ON THE EXAMPLE OF TURKMENISTAN

G.I. Mazurov, R.A. Durdybaev, V.O. Shwetz

Natural and technogenic factors determining the origin of dust storms are listed in the paper. Quantitative estimation of the effect of strong descending and ascending air flows accompanying a helicopter flight near the Earths surface is proposed. Ecological consequents of dust transfer are analyzed.
