

**FEATURES OF RUSSIAN TECHNICALLY
MEDIATED COMMUNICATION
(BASED ON THE TEXTS CREATED BY
THE CHINESE SPEAKERS OF RUSSIAN)**

M.E. Trubchaninova

The article is devoted to the description of verbal identity of the Chinese speakers of Russian in technically mediated discourse. The specific genre features of such interaction are also taken into account. The analysis of SMS and e-mail messages as well as telephone talks as channels for cross-cultural communication allows discovering the manifestation of marginality. Two factors determine marginality of the Chinese speakers of Russian: their interactivity and desire to adjust.
